How quickly its trademarks are registered

Over the last five years, AstraZeneca's marks took a median of **1.5 years** from filing to registration, faster than the market's 2.7 years. Most of that time is examination: 0.8 years from filing to acceptance (market: 1.9). Registration itself follows about half a year after acceptance.

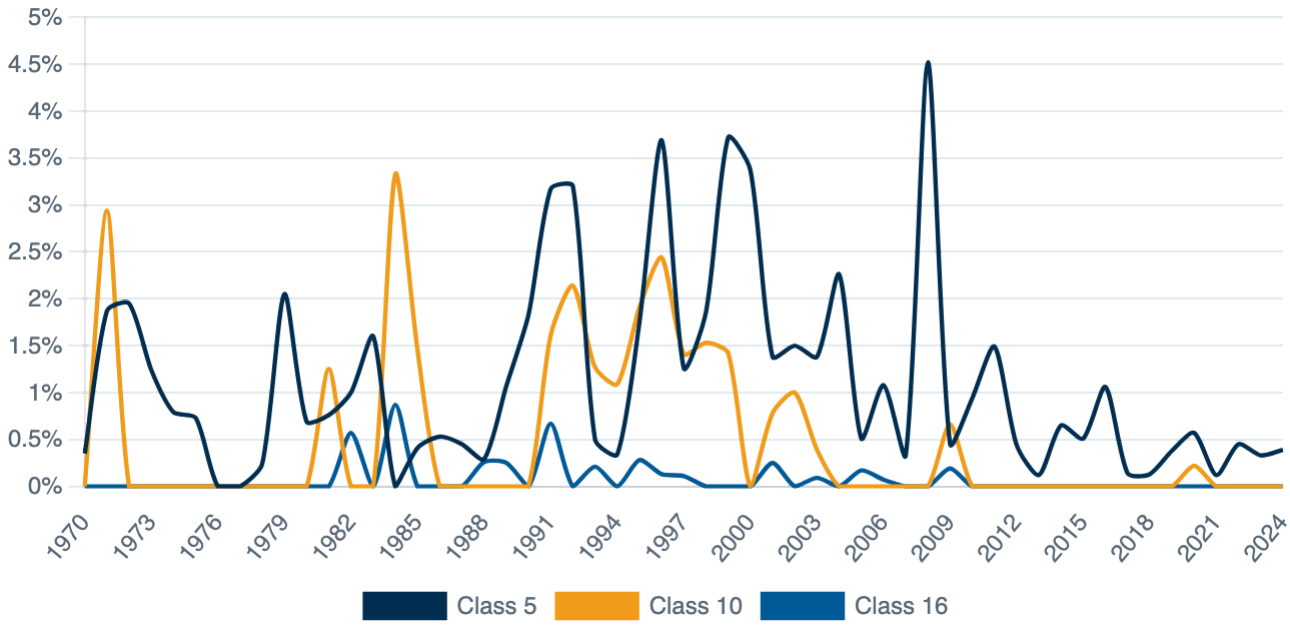

Median years from filing to registration per registration year, split into examination (filing → acceptance) and acceptance → registration; the dashed line is the market median. A high recent value means older applications came through that year.

Who files the most in AstraZeneca's classes

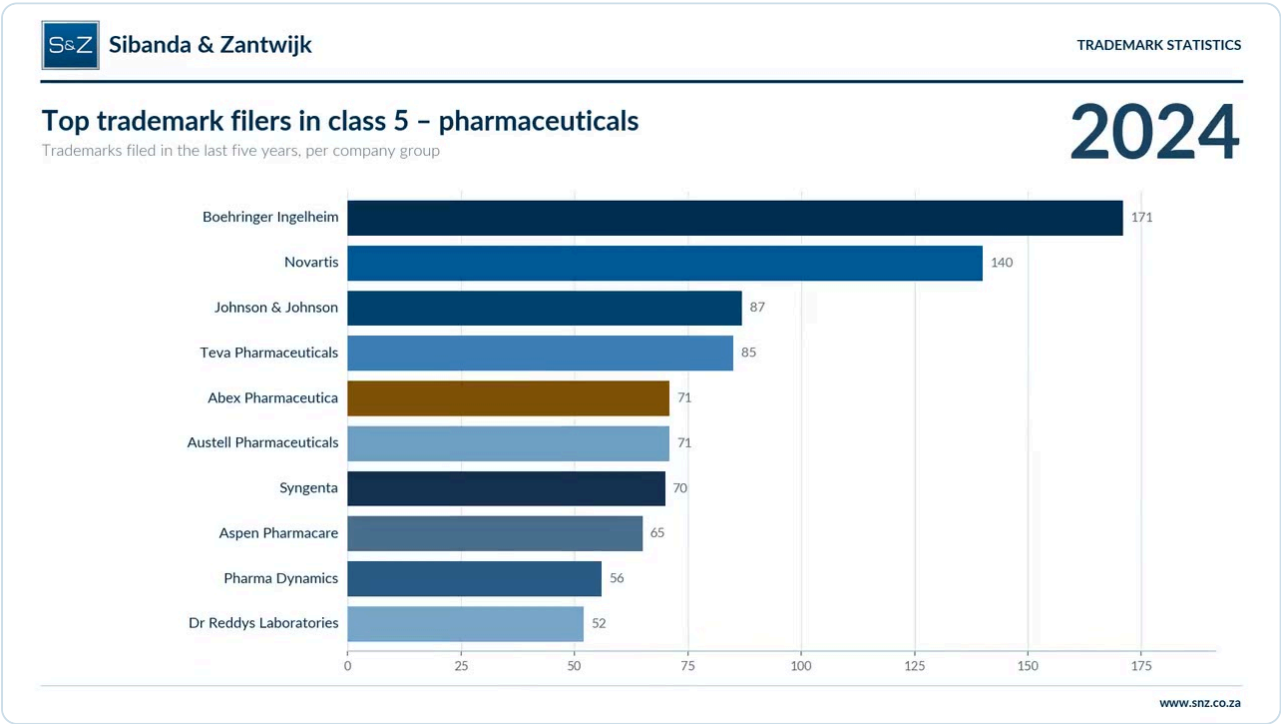

> Ranked by **number of trademarks filed in AstraZeneca's main classes** – any company that files there, whatever else it does (including retailers' own brands). This shows AstraZeneca's market position, not who is most like it.

In the last five years, AstraZeneca was **#29** of 2,050 filers in class 5 (pharmaceuticals), with 23 of 6,111 trademarks; **#316** of 814 filers in class 10 (medical devices), with 1 of 1,561 trademarks.

AstraZeneca – relevant export countries

South Africa exported **US$1.8 billion** of the goods AstraZeneca's main classes cover in the last year – pharmaceutical preparations; preparations and substances; diabetes; cardiovascular diseases (class 5); medical devices; inhalers (class 10); books; posters; stickers (class 16); chemicals; fertilizers; chemical preparations (class 1); computer software; software; computer hardware (class 9). Combining where these goods are exported, imported, growing and made (and copied), and what protection costs, these are the markets where AstraZeneca's trademarks matter most.
