# BP – South African trademarks

Updated 8 November 2026

BP is a UK-based global energy company. It produces and sells fuels and lubricants, including the Castrol brand.

How BP has built and protected its brands in South Africa – its trademark portfolio, where it expanded, how quickly its marks are registered, and who it competes with.

## A portfolio built over time

BP filed its first South African trademark in 1917 and has filed 1,028 since; its busiest year was 2000, with 199 new filings. The chart shows its filings per year from 1970.

Trademarks by filing year, up to 2024; applications still pending are not included.

### The names behind the portfolio

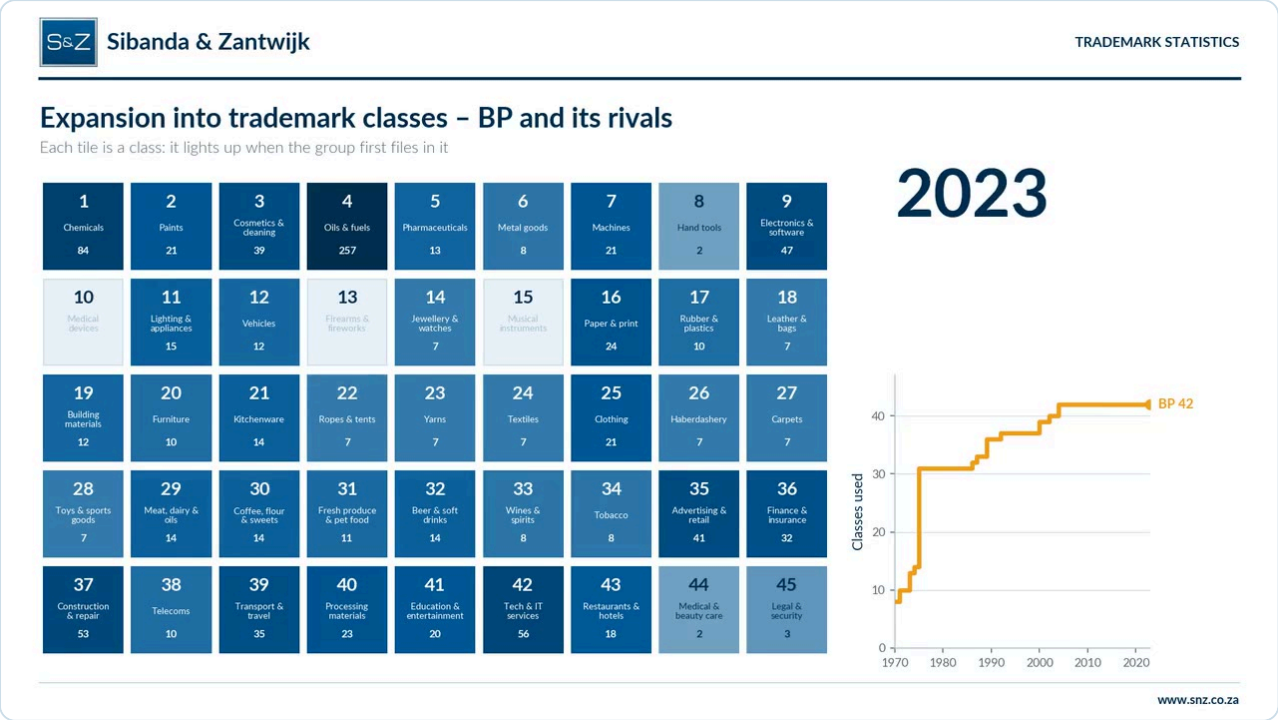

Over the years the group has filed under several names – earlier company names, holding companies and subsidiaries. We count them together.

| NAME | MARKS | FILING YEARS |
|---|---|---|
| BP | 1,038 | 1917–2023 |

## Where BP expanded its business

Trademark classes show what a business sells. BP's portfolio is concentrated in oils & fuels (class 4), chemicals (class 1), tech & it services (class 42). Its most recent moves were into medical & beauty care (2004), legal & security (2004), restaurants & hotels (2002).

Each tile is a class; it lights up when the group first files in it and darkens with more filings; the dots show how many of its closest rivals also file in that class. The chart compares the number of classes used with its rivals. The video runs from 1970; classes entered earlier are lit from the start.

## How quickly its trademarks are registered

Over the last five years, BP's marks took a median of **3.5 years** from filing to registration, slower than the market's 2.7 years. Most of that time is examination: 2.7 years from filing to acceptance (market: 1.9). Registration itself follows about half a year after acceptance.

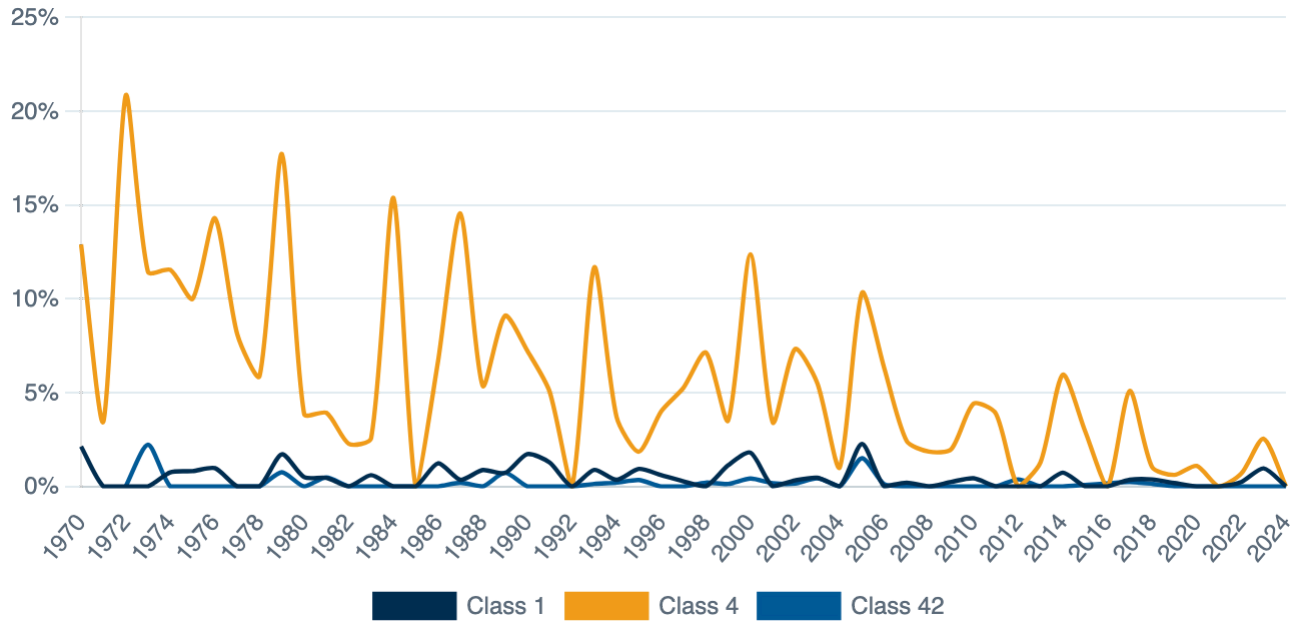

Median years from filing to registration per registration year, split into examination (filing → acceptance) and acceptance → registration; the dashed line is the market median. A high recent value means older applications came through that year.

## Who files the most in BP's classes

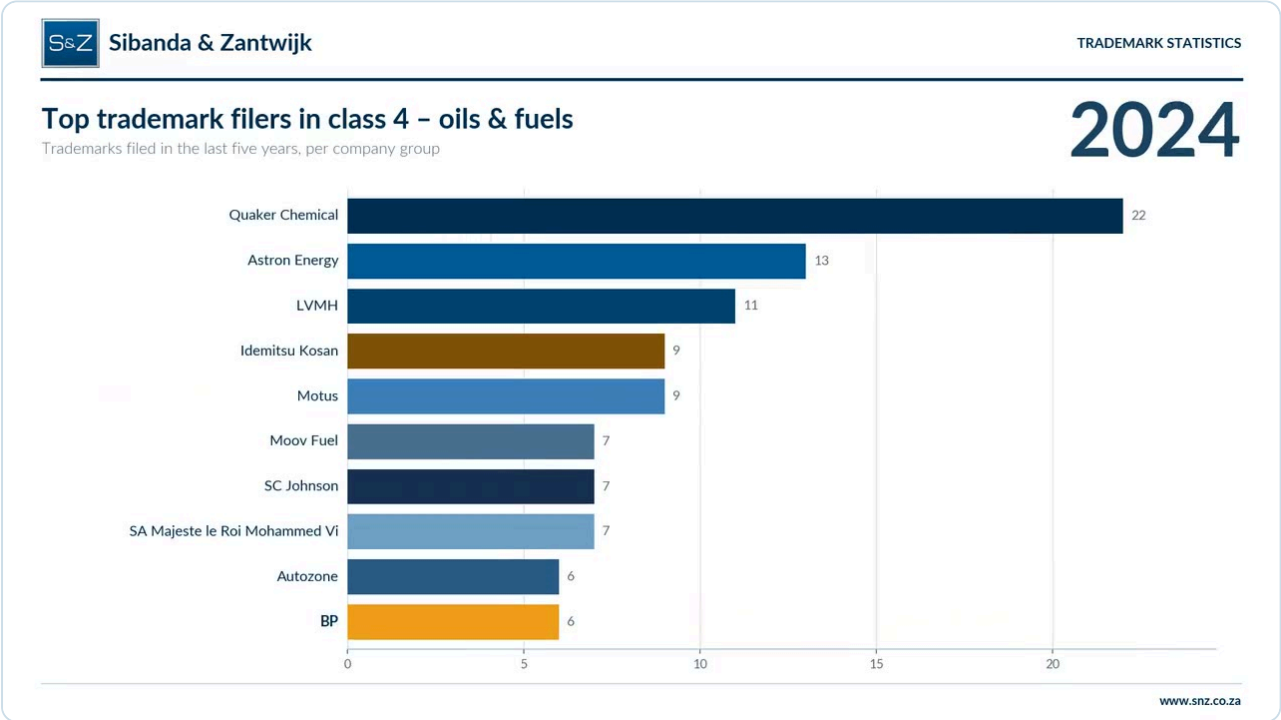

> Ranked by **number of trademarks filed in BP's main classes** – any company that files there, whatever else it does (including retailers' own brands). This shows BP's market position, not who is most like it.

In the last five years, BP was #9 of 419 filers in class 4 (oils & fuels), with 6 of 714 trademarks; #76 of 947 filers in class 1 (chemicals), with 4 of 2,054 trademarks.

BP's share of all trademarks filed in each of its main classes, per filing year.

## BP – relevant export countries

South Africa exported **US$3.9 billion** of the goods BP's main classes cover in the last year – lubricants; automotive; grease; lubricating oil (class 4); chemicals; fluids; brake fluid; coolants (class 1); software; batteries; battery chargers; computers (class 9); shampoos; fragrances; cleaning preparations; detergents (class 3). Combining where these goods are exported, imported, growing and made (and copied), and what protection costs, these are the markets where BP's trademarks matter most.

SA exports = South Africa's exports of these goods to the market in the last year. Ranked with the default weightings. Score 0–100 from South Africa's exports of the goods to the market, net imports, import growth, foreign

trademark filings, where the goods are made, market size and the cost of protection. Costs are total fees (official and professional) to file in 4 classes; ARIPO costs are per country, plus US$290 once per ARIPO application; S&Z = S&Z's own all-in price. Goods are taken from the classes and specifications, so the ranking is indicative.
