## How quickly its trademarks are registered

Over the last five years, Novo Nordisk's marks took a median of **1.5 years** from filing to registration, faster than the market's 2.7 years. Most of that time is examination: 0.8 years from filing to acceptance (market: 1.9). Registration itself follows about half a year after acceptance.

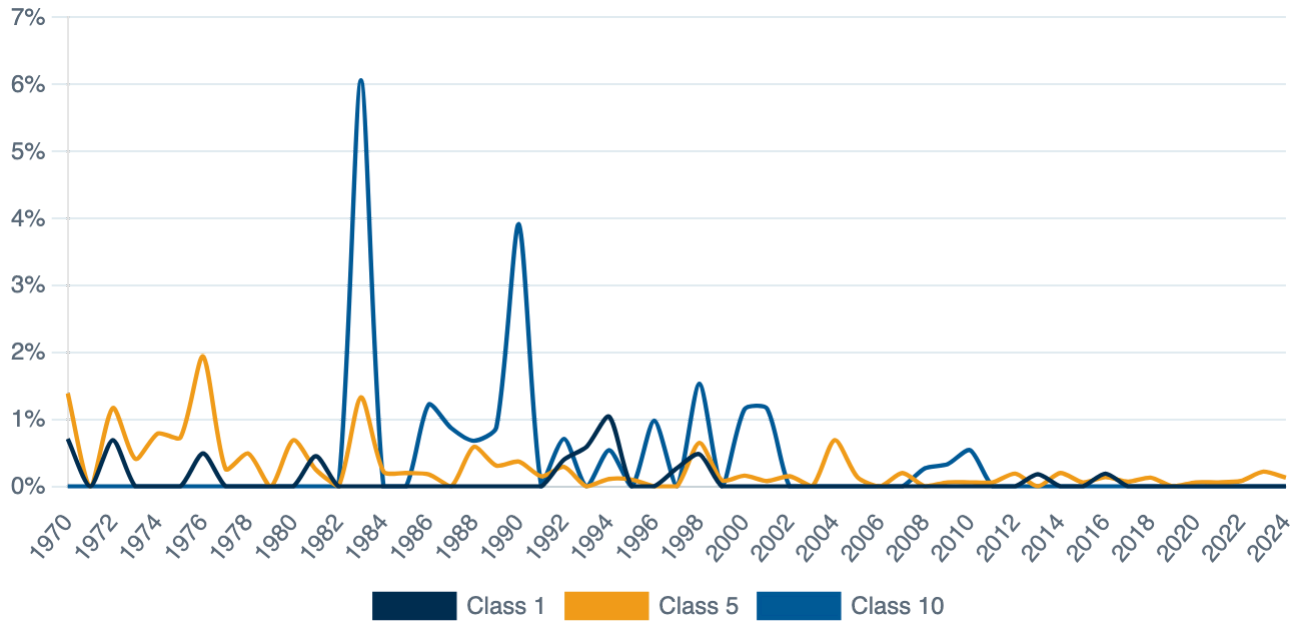

Median years from filing to registration per registration year, split into examination (filing → acceptance) and acceptance → registration; the dashed line is the market median. A high recent value means older applications came through that year.
